The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Niks et al or Kayaert et al or Chanen et al. No distinction is seen between the processes disclosed by Niks et al, Kayaert et al and Chanen et al, and that recited in applicant's claims. Niks et al, Kayaert and Chanen et al all disclose the fluid- bed granulation of urea melts to obtain granular urea, and all teach that biuret should be avoided in the urea product, disclosing biuret contents of less than 0.1 % in the urea product. (See col. 4, lines 19-29 of Kayaert et al, col. 4, lines 35-49 of Niks et al, and col. 6, lines 22-42 and col. 7, lines 3-20 of Chanenet al.) The amounts of biuret and water in the urea melt and urea granules would inherently satisfy the relationship recited in applicant's claim 1, when the urea product resulting from the granulation process has such a low biuret content.

Kono et al and Fabris et al are made of record for disclosing the production of urea granules.
